

# COLOUR DETERMINATION AND STRATIFICATION OF THE ANTERIOR TEETH

*1st time in Canada!*

The course will teach how to achieve predictable composite restorations of anterior teeth, following the anatomical stratification technique developed by **Dr. Lorenzo Vanini**.

Hands-on course (AGD Subject Code: 780)

(Includes Breakfast, Lunch, Breaks & Parking)

**Fee : \$ 989.00**

(maximum 30 participants)

**Saturday, 26 October, 2019**

8:30am - 4:30pm (7CE Hours)

**The Toronto Congress Centre (North Building)**

Address: 650 Dixon Rd, Etobicoke, ON M9W 1J1

Tooth color is the complex result of several factors that must be carefully analysed to understand the unique features that characterize the teeth of each patient.

Dr. Lorenzo Vanini

## Participants will learn how to:

- use the five dimensions of tooth color, according to the theory developed by Dr Vanini.
- use and fill the chromatic chart of each color dimension (Chromaticity, Value, Opalescent, Characterization, Intensives)
- use composite bodies to reproduce the color dimensions
- use a silicon stent to build up a central incisor with composite layers following each step of the stratification technique, done live by Dr Vanini.
- manage thickness of each composite layer and how to use a special high refraction index composite enamel.
- achieve correct tooth morphology (macro and micro) and the polishing phases that will provide a natural shiny surface.
